Motivation Of the Day :-

The loudest person in the room is usually the weakest, real power belongs to the one who knows the most but speaks the least.

Master the game in absolute silence, and watch them step aside when you finally make your move

MIK...

1674. Minimum Moves to Make Array Complementary

Medium

Topics

Companies

Hint

You are given an integer array `nums` of **even** length `n` and an integer `limit`. In one move, you can replace any integer from `nums` with another integer between `1` and `limit`, inclusive.

The array `nums` is **complementary** if for all indices `i` (0-indexed), `nums[i] + nums[n - 1 - i]` equals the same number. For example, the array `[1, 2, 3, 4]` is complementary because for all indices `i`, `nums[i] + nums[n - 1 - i] = 5`.

Return the **minimum** number of moves required to make `nums` **complementary**.

Example 1:

Input: `nums = [1, 2, 2, 3]`, `limit = 4`

Output: 1

Explanation: In 1 move, you can change `nums` to `[1, 2, 2, 3]` (underlined elements are changed).

0 1 2 3

$\text{nums}[0] + \text{nums}[3] = 1 + 3 = 4.$

$\text{nums}[1] + \text{nums}[2] = 2 + 2 = 4.$

$\text{nums}[2] + \text{nums}[1] = 2 + 2 = 4.$

$\text{nums}[3] + \text{nums}[0] = 3 + 1 = 4.$

Therefore, $\text{nums}[i] + \text{nums}[n-1-i] = 4$ for every i , so nums is complementary.

Constraints:

- $n == \text{nums.length}$
- $2 \leq n \leq 10^5$
- $1 \leq \text{nums}[i] \leq \text{limit} \leq 10^5$
- n is even.

Thought Process...

$\text{nums} = \{1, 2, 4, 3\}$, $\text{limit} = 4$

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 1996).

There are a number of reasons for this increase. First, the world population has increased from 5 billion in 1987 to 6 billion in 1997, and is projected to reach 8 billion by 2025 (UNEP 1997). Second, the world population is ageing, and the number of people aged 65 and over is projected to increase from 200 million in 1990 to 400 million in 2025 (UNEP 1997). Third, the world population is becoming more urban, and the number of people living in urban areas is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Fourth, the world population is becoming more mobile, and the number of people who are mobile is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997). Fifth, the world population is becoming more educated, and the number of people who are educated is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Sixth, the world population is becoming more affluent, and the number of people who are affluent is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Seventh, the world population is becoming more developed, and the number of people who are developed is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997). Eighth, the world population is becoming more industrialized, and the number of people who are industrialized is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Ninth, the world population is becoming more urbanized, and the number of people who are urbanized is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Tenth, the world population is becoming more mobile, and the number of people who are mobile is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Eleventh, the world population is becoming more educated, and the number of people who are educated is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twelfth, the world population is becoming more affluent, and the number of people who are affluent is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Thirteenth, the world population is becoming more developed, and the number of people who are developed is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Fourteenth, the world population is becoming more industrialized, and the number of people who are industrialized is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Fifteenth, the world population is becoming more urbanized, and the number of people who are urbanized is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Sixteenth, the world population is becoming more mobile, and the number of people who are mobile is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Seventeenth, the world population is becoming more educated, and the number of people who are educated is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Eighteenth, the world population is becoming more affluent, and the number of people who are affluent is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Nineteenth, the world population is becoming more developed, and the number of people who are developed is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twentieth, the world population is becoming more industrialized, and the number of people who are industrialized is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twenty-first, the world population is becoming more urbanized, and the number of people who are urbanized is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twenty-second, the world population is becoming more mobile, and the number of people who are mobile is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twenty-third, the world population is becoming more educated, and the number of people who are educated is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twenty-fourth, the world population is becoming more affluent, and the number of people who are affluent is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

Twenty-fifth, the world population is becoming more developed, and the number of people who are developed is projected to increase from 1 billion in 1990 to 2 billion in 2025 (UNEP 1997).

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to address the needs of children in the 1990s. The United Nations Children's Fund (UNICEF) has been instrumental in this regard, and has produced a series of reports on the state of the world's children (UNICEF 1990, 1991, 1992, 1993, 1994). The 1994 report, *State of the World's Children 1994*, contains a chapter on children in the 1990s, which outlines the challenges facing children in the 1990s and the need for a new approach to children's rights. The report also contains a series of recommendations for the 1990s, which are based on the principles of the United Nations Convention on the Rights of the Child (UNICEF 1994).

The purpose of this paper is to review the current state of knowledge about children in the 1990s, and to discuss the implications for policy and practice. The paper is organized as follows: first, a brief overview of the current state of knowledge about children in the 1990s; second, a discussion of the implications for policy and practice; and third, a conclusion.

1. Introduction

The 1990s have been a decade of rapid change for children in the world. The number of children in the world has increased by 1.5 billion since 1980 (United Nations 1994). The world's population is now over 5 billion, and the number of children under 15 years of age is expected to increase by 1.5 billion by the year 2000 (United Nations 1994).

At the same time, the world is experiencing a rapid increase in the number of children who are living in poverty. In 1990, over 1 billion children were living in poverty (United Nations 1994). By the year 2000, the number of children living in poverty is expected to increase to 1.5 billion (United Nations 1994).

The rapid increase in the number of children in the world, and the rapid increase in the number of children living in poverty, have led to a growing awareness of the need to address the needs of children in the 1990s. The United Nations Children's Fund (UNICEF) has been instrumental in this regard, and has produced a series of reports on the state of the world's children (UNICEF 1990, 1991, 1992, 1993, 1994).

The 1994 report, *State of the World's Children 1994*, contains a chapter on children in the 1990s, which outlines the challenges facing children in the 1990s and the need for a new approach to children's rights. The report also contains a series of recommendations for the 1990s, which are based on the principles of the United Nations Convention on the Rights of the Child (UNICEF 1994).

The purpose of this paper is to review the current state of knowledge about children in the 1990s, and to discuss the implications for policy and practice. The paper is organized as follows: first, a brief overview of the current state of knowledge about children in the 1990s; second, a discussion of the implications for policy and practice; and third, a conclusion.

2. Current state of knowledge

The current state of knowledge about children in the 1990s is based on a number of sources. The most important source is the United Nations Children's Fund (UNICEF), which has produced a series of reports on the state of the world's children (UNICEF 1990, 1991, 1992, 1993, 1994).

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) and the number of people in the private sector has increased by 1.2 million (1990–1999).

There is a growing emphasis on the need to improve the quality of care and services provided by the public sector. This has led to a number of initiatives, including the introduction of the Health Care Act 1999, the introduction of the NHS Direct website, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The Health Care Act 1999 is a landmark piece of legislation that has a number of key provisions. These include the introduction of the NHS Direct website, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Patient Choice Scheme. These provisions are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Direct website is a free-of-charge service that provides information and advice on a wide range of health and social care issues. It is available 24 hours a day, 7 days a week, and is accessible from anywhere in the UK. The NHS Direct website is a valuable resource for patients and the public, and it is an important part of the NHS's commitment to providing high-quality care and services.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Patient Choice Scheme is a scheme that allows patients to choose the hospital or service to which they are referred. This scheme is aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care. The NHS Patient Choice Scheme is a valuable resource for patients and the public, and it is an important part of the NHS's commitment to providing high-quality care and services.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

The NHS Choice and Control Fund is a fund that is used to support a number of initiatives aimed at improving the quality of care and services provided by the public sector. These initiatives include the introduction of the NHS Patient Choice Scheme, the introduction of the NHS Choice and Control Fund, and the introduction of the NHS Choice and Control Fund. These initiatives are aimed at improving the quality of care and services provided by the public sector, and at giving patients more choice and control over their care.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million (1990–1999) (Department of Health 2000).

There is a growing emphasis on the need to improve the efficiency of the public sector, and to ensure that the public sector is able to deliver the best possible value for money. This has led to a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices.

One of the key challenges facing the public sector is the need to improve the quality of services. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the implementation of new management practices, and the introduction of new technologies.

Another key challenge is the need to improve the efficiency of the public sector. This is a challenge that is being met by a number of initiatives, including the introduction of competition, the restructuring of public services, and the introduction of new management practices.

Finally, there is a need to improve the transparency of the public sector. This is a challenge that is being met by a number of initiatives, including the introduction of new standards, the implementation of new management practices, and the introduction of new technologies.

In conclusion, the public sector is facing a number of challenges, but it is also facing a number of opportunities. By implementing the initiatives outlined above, the public sector can improve the quality of services, improve the efficiency of the public sector, and improve the transparency of the public sector.

the 1990s, the number of people in the world who are undernourished has increased from 250 million to 800 million (FAO 1996).

There are a number of reasons why the world's population is becoming increasingly undernourished. One of the main reasons is the increasing demand for food, which is driven by population growth and the increasing demand for meat and dairy products. This has led to a significant increase in the use of fertilizers and pesticides, which has in turn led to a decline in soil fertility and a reduction in the amount of food that can be produced.

Another reason why the world's population is becoming increasingly undernourished is the increasing demand for land. As the world's population grows, the demand for land increases, leading to a significant reduction in the amount of land available for agriculture. This has led to a significant increase in the use of fertilizers and pesticides, which has in turn led to a decline in soil fertility and a reduction in the amount of food that can be produced.

There are a number of ways in which the world's population can be made more food secure. One of the main ways is to increase the use of sustainable agricultural practices, such as crop rotation and the use of organic fertilizers. This will help to maintain soil fertility and ensure that the land is able to produce enough food to feed the world's population.

Another way to make the world's population more food secure is to increase the use of water-efficient agricultural practices, such as drip irrigation. This will help to reduce the amount of water used in agriculture, which will in turn help to ensure that there is enough water available to grow crops.

There are a number of other ways in which the world's population can be made more food secure, such as by increasing the use of sustainable fishing practices and by reducing food waste. By taking these steps, the world's population can be made more food secure and the demand for food can be met in a sustainable way.

The world's population is becoming increasingly undernourished, and this is a serious problem that needs to be addressed. By taking the steps outlined above, the world's population can be made more food secure and the demand for food can be met in a sustainable way.

The world's population is becoming increasingly undernourished, and this is a serious problem that needs to be addressed. By taking the steps outlined above, the world's population can be made more food secure and the demand for food can be met in a sustainable way.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase by 1.5 billion (United Nations 1994).

There is a growing awareness of the need to develop a new generation of young people who are able to deal with the challenges of the 21st century. This has led to a number of initiatives aimed at promoting the development of young people's skills and attitudes. One of the most prominent of these is the United Nations' *World Education Forum* (1994), which has set out a number of key areas for action.

The *World Education Forum* has identified four key areas for action: (1) *Basic Education*, (2) *Technical and Vocational Education and Training* (TVET), (3) *Higher Education*, and (4) *Adult Education*. Each of these areas has a number of specific objectives and targets.

The *World Education Forum* has also identified a number of key areas for action in the field of *Education for Sustainable Development* (ESD). These include: (1) *Environmental Education*, (2) *Human Rights Education*, (3) *Peace Education*, and (4) *Gender Education*.

The *World Education Forum* has also identified a number of key areas for action in the field of *Education for All* (EFA). These include: (1) *Basic Education*, (2) *Technical and Vocational Education and Training* (TVET), (3) *Higher Education*, and (4) *Adult Education*.

The *World Education Forum* has also identified a number of key areas for action in the field of *Education for Sustainable Development* (ESD). These include: (1) *Environmental Education*, (2) *Human Rights Education*, (3) *Peace Education*, and (4) *Gender Education*.

The *World Education Forum* has also identified a number of key areas for action in the field of *Education for All* (EFA). These include: (1) *Basic Education*, (2) *Technical and Vocational Education and Training* (TVET), (3) *Higher Education*, and (4) *Adult Education*.

the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion (United Nations 1999).

There is a growing awareness of the need to address the needs of children in the 21st century. The United Nations Convention on the Rights of the Child (1989) has been signed by 112 countries, and the United Nations Millennium Declaration (2000) has set out a commitment to 'ensure that all children, everywhere, have access to primary education by the year 2015'. The United Nations Secretary-General Kofi Annan (1999) has called for 'a new global compact for children' to ensure that the rights of children are protected and promoted.

The United Nations Secretary-General has also called for a 'new global compact for children' to ensure that the rights of children are protected and promoted. The United Nations Secretary-General has also called for a 'new global compact for children' to ensure that the rights of children are protected and promoted. The United Nations Secretary-General has also called for a 'new global compact for children' to ensure that the rights of children are protected and promoted.

The United Nations Secretary-General has also called for a 'new global compact for children' to ensure that the rights of children are protected and promoted. The United Nations Secretary-General has also called for a 'new global compact for children' to ensure that the rights of children are protected and promoted. The United Nations Secretary-General has also called for a 'new global compact for children' to ensure that the rights of children are protected and promoted.
